

CURRENT CONDITIONS

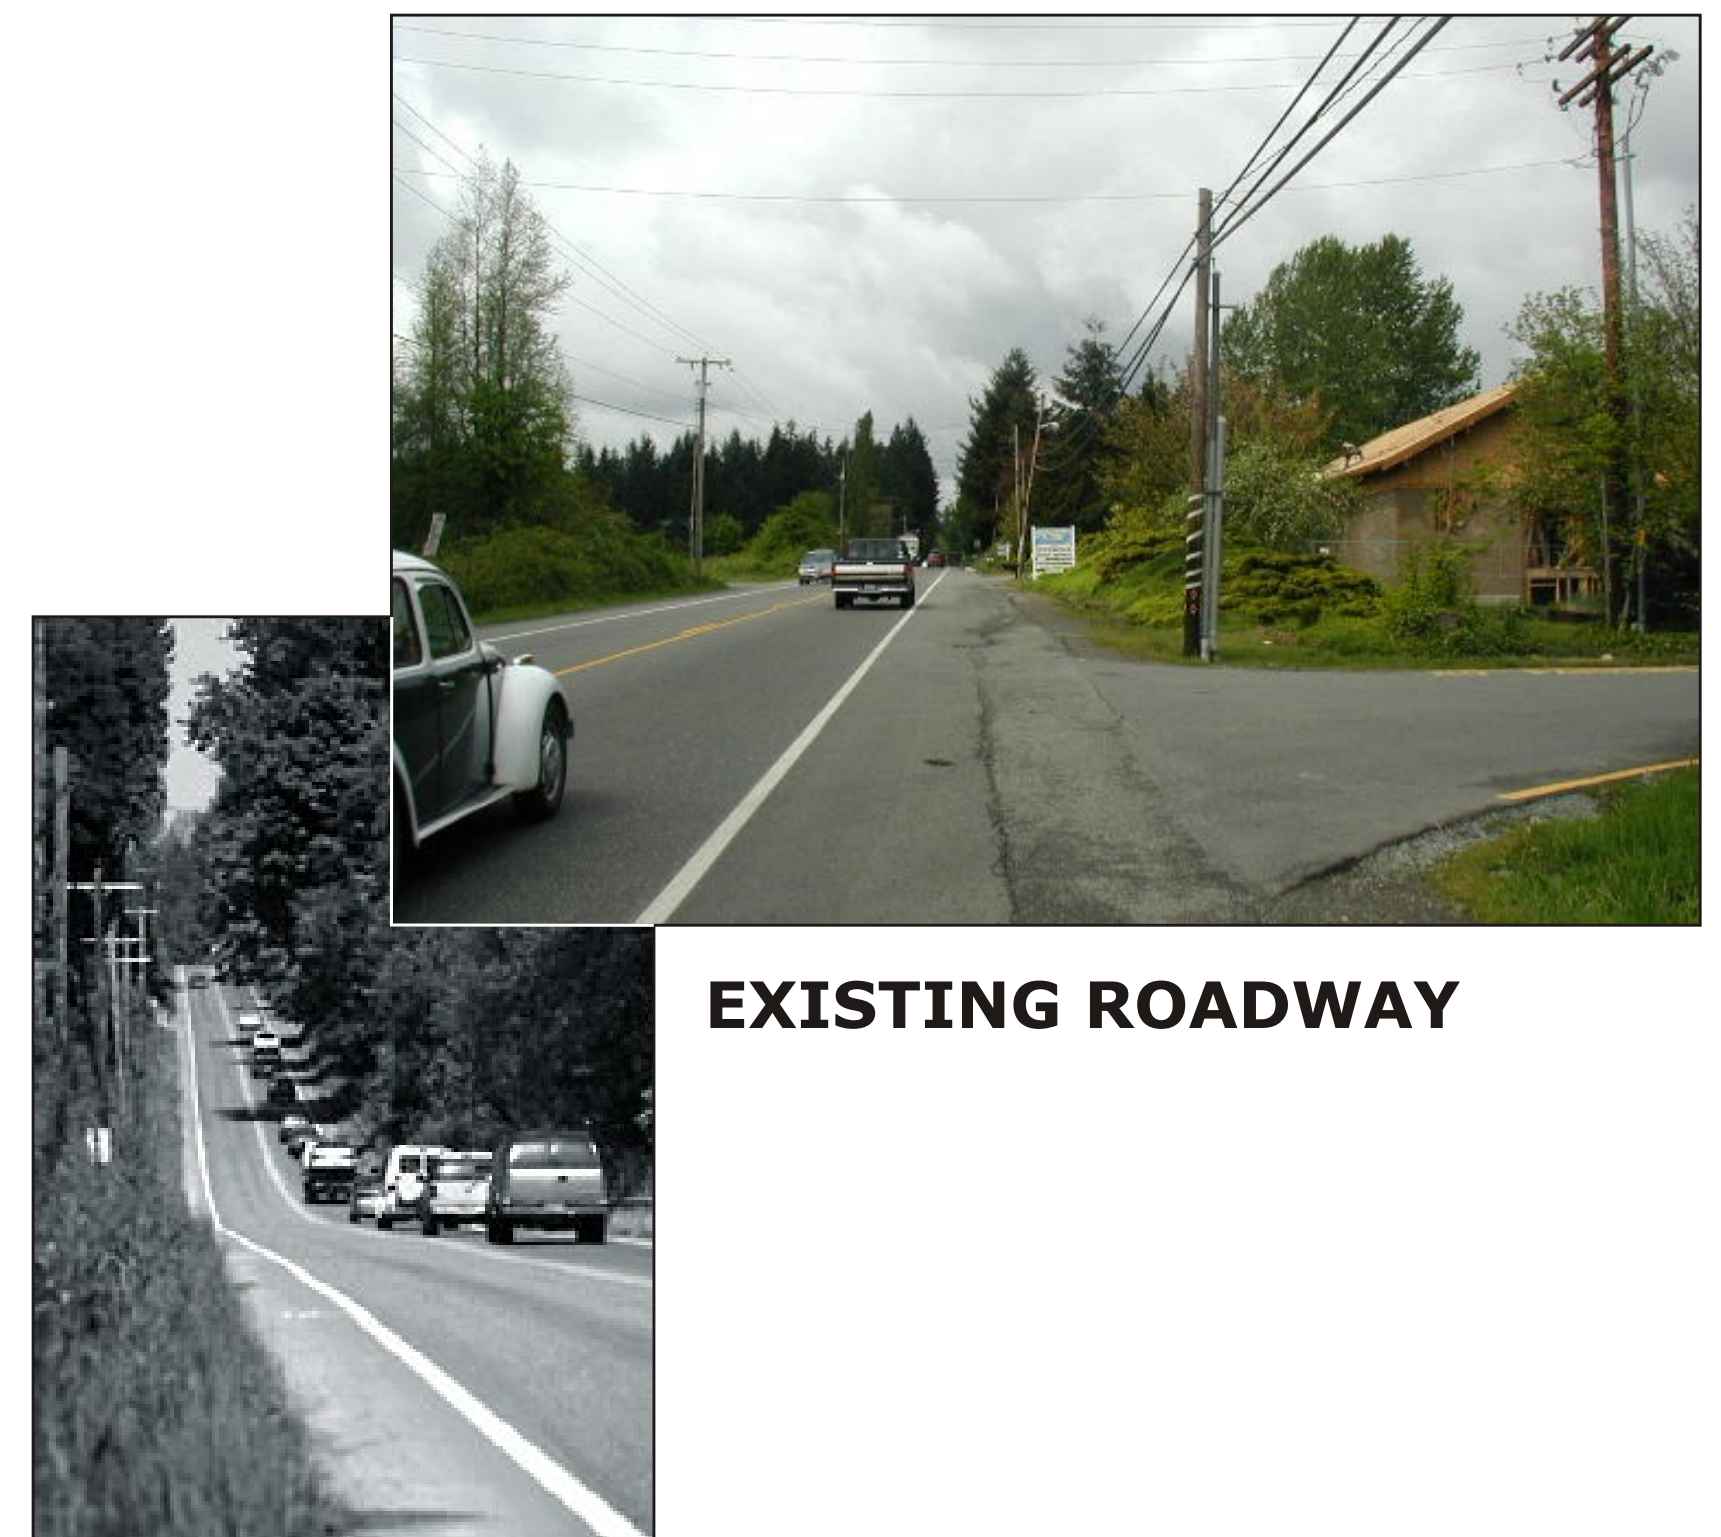

NE Woodinville-Duvall Road is a two lane principal arterial with a posted speed of 40 mph. The shoulders are shared by pedestrians and bicyclists. There are signals at 168th Avenue, 182nd Avenue and Avondale Road, and a lighted crosswalk at Cottage Lake Park. There are bus stops for Northshore Schools and Metro. There is limited illumination.

TRAFFIC

More than 22,000 vehicles travel NE Woodinville-Duvall Road per day and as a result traffic congestion has increased. In the afternoon peak hour, a traveler can expect an average speed of less than 30 mph as they travel along the corridor, which can result in a cumulative loss of more than three hours in a year.

Analysis shows that 60% of the accidents within the study segment are rear-end accidents, largely due to cars making left turns from the through lane. Due to a lack of sidewalks, residents do not have adequate pedestrian access to the roadway, recreational facilities and local businesses.

2002

- The road currently carries an average of 22,000 cars each day.

2025

- The road is forecast to carry an average of 30,000 cars each day.

ENVIRONMENTAL CONDITIONS

- Wetlands are present along much of the route
- The roadway runoff is not treated
- Salmonid bearing
